6.20 Asistencias_wpf.Properties.Resources Class Reference

A strongly-typed resource class, for looking up localized strings, etc.

Package Functions

- [Resources](#) ()

Properties

- static
global::System.Resources.ResourceManager [ResourceManager](#) [get]
Returns the cached ResourceManager instance used by this class.
- static
global::System.Globalization.CultureInfo [Culture](#) [get, set]
Overrides the current thread's CurrentUICulture property for all resource lookups using this strongly typed resource class.

Static Private Attributes

- static
global::System.Resources.ResourceManager [resourceMan](#)
- static
global::System.Globalization.CultureInfo [resourceCulture](#)

6.20.1 Detailed Description

A strongly-typed resource class, for looking up localized strings, etc.

Definition at line 25 of file Resources.Designer.cs.

6.20.2 Constructor & Destructor Documentation

6.20.2.1 Asistencias_wpf.Properties.Resources.Resources () [package]

Definition at line 33 of file Resources.Designer.cs.

```

34         {
35         }
```

6.20.3 Member Data Documentation

6.20.3.1 global.System.Globalization.CultureInfo Asistencias_wpf.Properties.Resources.resourceCulture [static], [private]

Definition at line 30 of file Resources.Designer.cs.

6.20.3.2 global.System.Resources.ResourceManager Asistencias_wpf.Properties.Resources.resourceMan [static], [private]

Definition at line 28 of file Resources.Designer.cs.

6.20.4 Property Documentation

6.20.4.1 global.System.Globalization.CultureInfo Asistencias_wpf.Properties.Resources.Culture [static], [get], [set], [package]

Overrides the current thread's CurrentUICulture property for all resource lookups using this strongly typed resource class.

Definition at line 60 of file Resources.Designer.cs.

6.20.4.2 `global::System.Resources.ResourceManager Asistencias_wpf.Properties.Resources.ResourceManager` `[static]`, `[get]`, `[package]`

Returns the cached `ResourceManager` instance used by this class.

Definition at line 42 of file `Resources.Designer.cs`.

The documentation for this class was generated from the following file:

- `Asistencias_wpf/Properties/Resources.Designer.cs`

6.21 Asistencias.Properties.Resources Class Reference

A strongly-typed resource class, for looking up localized strings, etc.

Package Functions

- `Resources` ()

Properties

- `static`
`global::System.Resources.ResourceManager ResourceManager` `[get]`
Returns the cached `ResourceManager` instance used by this class.
- `static`
`global::System.Globalization.CultureInfo Culture` `[get, set]`
Overrides the current thread's `CurrentUICulture` property for all resource lookups using this strongly typed resource class.

Static Private Attributes
